

“ADVANCES IN EMERGENCY COMMUNICATIONS”
Multi agency aspects

Saturday 23rd October 2010

At the Melbourne University Private Hawthorn Campus
442 Auburn Road, Hawthorn MELREF: 59 E2

This, our 32nd Seminar, will again be a One-day presentation. We have selected as the theme “ADVANCES IN EMERGENCY COMMUNICATIONS” **Multi Agency Aspects** addressing ‘in place’ and planned modifications, advances and application of the many communication systems utilised by mainly the Emergency Services to facilitate dispersal of info both internally, inter agency and to the public. We believe that the subject matter will be of great interest to members of the various Emergency Services, Support Agencies, Municipalities and the Corporate Sector. Our Speakers will present aspects of the theme and, as always, we are targeting the “hands on” people and the planners.

The program is still being finalised. Among our presenters we will have speakers from:-

- Victoria Police Media.
- Victoria State Emergency Service
- Australian Maritime Safety Authority
- Office of the Emergency Services Commissioner
- Wireless Institute Civil Emergency Network
- Metropolitan Fire Brigade
- Royal Flying Doctor Service

Further details of the seminar will be promulgated once the program is completed.

The Committee believes that this selection of interesting, thought provoking subjects will once again ensure that our attendees will receive value for the cost of the seminar. Unfortunately, our seminar venue is limited to the first 150 attendees so book early and avoid disappointment. Further details will be circulated when finalised. At the end of the day's program we will provide the usual facility for general discussion with convivial's.

Saturday October 23rd 2010 - [Mark your diary now]
